

NOTES FOR THE ELECTRICAL ENGINEERING MAJOR

If you need to take the Chem Proficiency/Placement Exam, sign up at https://www.surveymonkey.com/s.aspx?sm=RS1RruhRUzHJTKi7om7CWA_3d_3d. Once completed, keep a screen shot of the results for proof that you completed it. You must score 45/60 on this exam or complete CHM 1100.

Students who take EE 4310 (E&M) in Winter 2010 will take it as a 5 credit class. If you are graduating under the 2009–10 requirements, which only requires a 3 credit E&M course, the 2 credit differential may be counted toward the tech elective requirement.
