## PSY 3360 Abnormal Psychology

"Science as a Response to Suffering" Paper

**Step 1**: Using the <u>Psychology Subject Guide</u>, open PsycINFO and search the Thesaurus for your selected disorder – this will gather all articles on the same topic under one term (e.g. instead of "anorexia, the subject term in this database is "anorexia nervosa").

Try one of the two strategies below based on your topic:

Strategy 1: look for potential causes/etiology of the disorder

Strategy 2: look for ways to reduce this form of suffering (e.g. treatment)

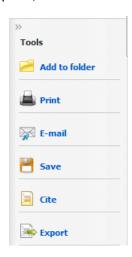

**Step 2**: Narrow your results – use the facets on the left side of the search results to limit only to "Peer Reviewed" resources, full text, or a specific date range.

**Step 3**: Refine further – Choose Empirical Study or Literature Review to limit to research using only those types of methodology.

**Step 4**: Review the article you've found and look at their subject terms to refine your search if needed. Use the tools to collect useful resources into a folder\*, then print, email and cite them all at once.

\*Create an account in Ebscohost to save articles in your folder(s) indefinitely
